

system 7000 80mm performance partitioning system

SAS system 7000

System description

SAS System 7000 is a nominal 80mm steel relocatable partitioning system that provides up to 30 minutes fire performance and acoustic performance to 51dB. It is available in any combination of solid, fully glazed or part glazed elevations.

Comprising a galvanised steel stud framework with aluminium profiles and cover trims, it can be installed as single offset or double glazed or faced with a single layer of 12.5mm thick gypsum plasterboard.

Door frames are supplied as manufactured kits for rapid on-site fitting with a range of integrating doors available.

The overall thickness of the system is 85mm, with all extruded aluminium and steel profiles available as polyester powder-coated to a range of colours.

Prices for System 7000 are available on request.

System benefits
